### **Workshop Description**

Are you ready to rumble? We've all felt the thrill of competition and the agony of a boring lesson. This session will help you 'stay in the game!' Get 'warmed up' by learning gamification techniques that will change your classroom. Then 'run through' both tech and non-tech tools that will make your existing content more interactive. Everybody walks out a winner by learning how to apply entertaining and engaging tools that can be adapted to a specific lesson or unit, as well as how to design an entire course around gamification techniques!

### **Workshop Resources:**

All materials from the workshop can be found electronically at
